This merger is an outrageous concept. We need more cable companies, not less. We need MORE competition, not less. Your approval is already very low, so stop the greed and corruption and organized crime actions. Hopefully the FCC will not succumb to bribes and work to make our internet better, more efficient and equally available. I'm sorry to hear that the new FCC chair is a former executive from one of the large cable companies. I do not understand how this conflict of interest is ethical or allowed.
