I am Linda A. Davidson, Chair of The Inge Davidson Foundation, permittee of an LPFM licensed to Bryn Mawr, PA (WZML-LP). I support the Commission's proposal to add an LP250 class of LPFM station. I would also like the Commission to consider allowing current LPFM licensees and permittees to enter into agreements with each other so both can upgrade and also give them the ability to use terrain obstruction and/or directional antennas to protect each other. In this way the most potential benefit to this new class of station can be realized. I believe that adopting this proposal is in the public interest, convenience and necessity.

Respectfully submitted,

LINDA A. DAVIDSON
