We live in Teton County WY and receive no local WY stations on Direct TV. It is not right that Direct TV supplies us with ID local stations and ID PBS from Boise some 275 miles away and not WY PBS. We receive news, weather and politics from ID but we live and vote in WY. The Stela reauthorization should force direct TV to supply us with programming from WY PBS. More than 200,000 folks in WY are deprived of local programming and more importantly WY emergency notifications. This situation is not correct or equatable.
