Dear fcc personal,

The radio station as well as myself would greatly appreciate the wattage increase. I'm a host for the arts showcase for 93.5. The show is a community based platform for artists to be inspired and for local events to be broadcast so that the listeners are informed and educated about all the great talent that this part of the valley has. We would love being able to reach more people and we see it as a necessity because as of right now downtown doesn't even hear the show, but they need to.

Thank you for taking the time to read this, have a great day!
