WXTH-LP in Richwood, WV - We live in a very mountainous region in the middle of Appalachia. An increase in signal strength would mean so much to our area and our listeners. It would allow everyone in the area the opportunity to listen to the station which is by all means a community radio station that can even operate 24/7 in the event of an emergency or natural disaster where we would lose power. Currently, there are some listeners on the edge of town that can only barely pick up the station because of the topography of our area. Thank you!
