I do not know who to contact about this harassment I have been getting. I have seen psychiatrist, counselors, psychologist, and was admitted into a mental institution. I spoke with law officials in different counties. I have been hearing things, seeing things, feeling things and having dreams that are realistic. The voices talk about the KKK that needs me to move from my home. They talk about my past and give me false hope. They want let me work, go to church, or having any kind of social life. I moved to Crossville October 2013 and it has been torture. Because of this I am unable to communicate or see my children or grandchildren due to my grandchildren having an African American father. I have reached out to so many people and I do not know what to do. I admitted my self to a different mental facility and All I am told I need to learn to cope with it. I was diagnostic with ADHD/ADD in 2011 and I became a person again. What do I do? I have family that works in the medical field and one that works for the government. And I could not even get in touch with them due to this.

My daughter Brittany lives in Washington DC with her two children, they need family... they need me.

My daughter Jallysa is in the Army now lives in Colorado.

My son Trevor joined the Marines.

There has been to many coincidences, texts, Facebook messages. I actually recorded these voices. There was talk of Voice 2 Skull and Remote Neural Monitoring. I do not know what these things are, I am having to stay by myself, I have been separated from my husband due to this. How can you cope with the voices when they talk 24 hours a day. I have been away from home and still heard them. Can you direct me in the right direction?
