

60001077509.txt

As a concerned citizen with professional experience in 911, I urge you to reject the proposal to sunset the requirement of forwarding NSI phones to 911 call centers for the sole reason that 911 is a lifeline that sometimes transcends a persons ability or means to retain service at all times. I agree whole-heartedly with the previous comments made by Mission Critical that other means should be explored and service to those that are most in need should not be compromised. 911 is not a subscription service. It is a service to the public that should not be hindered in any way.
