I am submitting a comment regarding the STELA Reauthorization Act of 2014. I believe that the "local into local" rule should change so that my provider (Direct TV) can carry Wyoming PBS. As a resident in a remote area of Albany County in Wyoming, I do not have access to any local programs. We live in a digital world, and while Wyoming is a large area with a smaller population, we as equal taxpayers should have equal access to programming services. Thank you for your consideration regarding this issue.
