Cause 4 Paws, Inc, license holder of WBED-LP, would ask you pass the proposed changes. We also believe you should put LPFM's on an equal footing with translators in signal/power output and HAAT rules. LPFM's provide EAS and weather warnings to communities who do not get the same from a translator designed to enhance a station's footprint while they carry canned programming. For community radio to be successful, LPFMs must be given the equal chance that is given to translators who pipe in many times, non-local programming. (AM translators not included in these thoughts)  
Thank you for your consideration in this matter.  
The Board of Cause 4 Paws, Inc. Bedford, Indiana
