

KJAM 107.5 FM

1036 14th Ave, P.O. Box 99 Sidney, NE 69162

June 11, 2015

To whom it may concern:

KJAM 107.5 FM would like to express our support of the proposal to increase the maximum power for LPFM stations from 100 watts to 250 watts.

KJAM - LP 107.5 FM serves listeners in the community of Sidney, Nebraska. This is a rural area of western Nebraska with many small towns, farms and ranches over 20 miles from the city of Sidney where our antenna is located. The increase in power would allow us to reach more remote listeners. It would also allow our station to reach down the road further as our listeners travel between the surrounding communities.

Many of our listeners are seniors and are confined to their homes or retirement homes. This increase would also improve the quality of the signal on their home radios, providing clear reception without static.

We thank you for considering this proposal

Warm regards,

KJAM 107.5 FM of Sidney
