

60001086132.txt

Our radio station WXJR 102.1 FM is in a rural mountain region currently operating at 100 watts. Due to the topography our broadcasting does not come in clearly in especially low lying areas within our range. Being given license to run at 250 watts I believe would go a long way in resolving this issue.

I sincerely hope that you will consider making this allowance for the benefit of our small town.

Many Thanks,  
Susan
