**Re: Certification of Public Notice of Network Change under Rule 51.329(a)  
CC Docket No. 96-98**

Dear Ms. Dortch:

Pursuant to the notification requirements in §51.325 -- §51.335 of the Commission's rules, AT&T hereby submits this certification of Public Notice of Network Change. A description of the network change is provided below:

Number	Type of Change Planned	Location of Change
ATT20150112L.1	AT&T Wisconsin is announcing that copper facilities will be replaced with fiber optic cable and digital loop electronics in the CHFLW111 wire center due to a bridge replacement. Current copper facilities must be removed to allow for the construction and it is not feasible to locate on the power company pole line that also needs to be relocated at a later point in the project. This will affect some AT&T facilities in an area east of the Lake Wissota channel on CTH X. The river channel is east of the intersection of CTH J and CTH X. AT&T project numbers are 9680126 and 9680138. Implementation date is 3rd Qtr, 2015.	Chippewa Falls, WI

This notice is also available at: <https://ebiznet.att.com/networkreg/>

If you have any questions, please do not hesitate to contact me at (202) 457-2164.

Sincerely,

  
Victoria Carter-Hall

Notice: <https://ebiznet.att.com/networkreg/>

**Network Change:**

AT&T Wisconsin is announcing that copper facilities will be replaced with fiber optic cable and digital loop electronics in the CHFLWI11 wire center due to a bridge replacement. Current copper facilities must be removed to allow for the construction and it is not feasible to locate on the power company pole line that also needs to be relocated at a later point in the project. This will affect some AT&T facilities in an area east of the Lake Wissota channel on CTH X. The river channel is east of the intersection of CTH J and CTH X. AT&T project numbers are 9680126 and 9680138. Implementation date is 3rd Qtr, 2015.

**Description of Type of Changes Planned:**

Copper facilities BHBA-300, BHAA-400, and BHAA-600 run on an aerial line on the north side of the existing bridge. To facilitate crane operation in the removal of the bridge these cables require removal. The power company has an aerial line on the south side of the bridge that also has to be relocated but not until phase 2 plus the spans of the relocation appear to be too long to support a new 400 pair copper cable. Fiber already exists on the east side of the bridge through another route that is not in conflict. The affected serving area is mostly along CTH X on the east side of the bridge. This area will be interfaced and a new DLC system will be placed and utilize existing fiber to provide service.

**Description of Reasonably Foreseeable Impact of the Planned Changes:**

After this plan is implemented and work is completed, metallic feeder facilities from the Central Office to the affected areas will no longer be available. Unbundled loops that are defined as compatible with Digital Loop Carrier (DLC), e.g., those defined to transport POTS-grade service or ATM DSL, will be transferred to the DLC systems without consequence. Competitive carriers employing unbundled loops that are defined to require metallic facilities, e.g., Digital Subscriber Line (DSL) or line sharing circuits will be notified individually. This notification is intended to allow the affected carrier to convert the circuit to one compatible with DLC. Currently there are no known Competitive Carrier circuits of this type on the affected copper facilities.

**Location of Change:**

CLLI Code/Statewide	City	State	Implementation Date
CHFLWI11	Chippewa Falls	WI	3 <sup>rd</sup> Qtr 2015
