

60001090766.txt

ATT is lowering our speed after we reach 5GB when we have paid for unlimited data service and have had this service for over 5 years.
Per ATT: "your data service has reached 75% of your 5GB network management threshold. If you exceed 5GB you may experience reduce data speeds at times and in areas that are experiencing network congestion".
That was not mentioned in our service contract.
