Dear Chairman Wheeler:

I am CEO of TCB Management Group, Inc. & TCB Security Services, Inc. Our company provides contract physical security and dispatch services to local, state and federal government agencies and private sector organizations. Our services are a vital link to public safety in many rural areas of Oregon.

We have chosen a competitive carrier for our voice and data services. They provide the individualized services and customer support we need. We have found that larger carriers lack the support we need for our 24 hour work environment. In addition the service level is not that in which we see with our current providers. Business phone and data services area mission critical to our business operations and the safety of our employees and the public.

We commend the FCC's efforts to provide customers with more choices for broadband service. As technology transitions and more services move to IP based solutions, we encourage you to protect the wholesale access market. This will ensure that our ability to choose a competitive provider, based on factors including customer service and price, will remain intact.

By keeping the marketplace open for more competition, the FCC will help ensure that businesses like ours have the power to choose the broadband provider that is the best fit for our needs and growth.

Sincerely,

*Mike G. Goff*
