In Re: ET Docket No. 13-44
Ex Parte meeting

Dear Ms. Dortch:

On Wednesday, June 24th, Cathy Seidel and the undersigned from Motorola Solutions, Inc, (“MSI”) and David Hilliard and Mike Lewis from Wiley-Rein, LLP met with Chief Julius Knapp, Bruce Romano and Rashmi Doshi, all of the Office of Engineering and Technology.

The topic of the meeting was the FCC’s Report and Order, released on December 30th 2014, which updated the Commission’s radiofrequency equipment authorization program¹. During the meeting concerns regarding the impact of the new requirement that laboratories used to collect test data for certification under all FCC rule parts will need to be accredited were discussed, including specific questions regarding the process for accrediting testing laboratories in countries with no Mutual Recognition Agreement (“MRA”) with the United States. Also discussed was the limited amount of time allotted in the Order between the Order’s effective date and the laboratory accreditation requirement taking effect, even though there is currently no process for achieving this if a lab is in a country that does not have an MRA with the U.S.

Respectfully Submitted,

/s/ Chuck Powers
