On June 23, 2015 Time Warner Cable had a massive internet, cable and phone outage from 4AM-10:30AM . this effected 11.4M customers and today is June 30 and nothing on any national news media didn't cover this story and neither did Time Warner cable did not announce this massive hack attack. I called Time Warner cable on June 23, 2015 I talked to 3 employees told me the outage was due to a Hack or breach into the modems and cable boxes. Time Warner cable should of notified by mail or by public announcement that they were hacked into still nothing.
