I have registered on the national do not call list and continue to receive many many unwanted calls. Most often no one is on the line. At times unsolicited calls are trying to sell me something. They continue to call even when I request to be put on their do not call list. I now do not answer unknown numbers or numbers from area codes that are unfamiliar, It still is inconvenient to rush to the phone to find it's one of these calls. They come at all times of the day or night 7 days a week.
