I opposed the FCC Docket No. 13-24 and 03-123 where required to have our last four number of SSN. It's does not function equality as everyone else while FCC is just the agent under the Federal. Their word always say "not to share with other" while we have to share with third party as you require all the rest of Video Relay Service to contact each one of individual to get our last four SSN. Why don't you get up and do your job and not the VRS's job because they are the provider while you are one want our SSN and not the VRS.

Again I opposed on what you did and scary to not know who is handle behind. Again, I opposed and please drop that requirement of SSN. It should run on the telephone provider or utility billing is good ENOUGH!

Andrew
