Dunnell Telephone Company

Response to Line 510 – Service Quality Standards and Consumer Protection Rules

Surpasses PUC minimum service quality standards – The Nova Telephone Company (“Filer”) hereby certifies that its voice service surpasses the minimum standards required by the Minnesota Public Service Commission (“MPSC”) for eligible telecommunications carriers. Over the history of the Filer’s provision of voice services to its customer, it has consistently exceeded those minimum standards.

Publically available rates, terms and conditions - Once more, the Filer’s rates, terms and conditions for voice service are publically available through OCC approved local exchange tariffs.

Protection of consumer information - The Filer complies with the Federal Communications Commission Consumer Proprietary Network Information (“CPNI”) rules (47 C.F.R. Sections 64.2001-64.2011). The compliance is assured through certification for CPNI compliance by March 1 of each year, in addition to its own internal company procedures. The Filer also complies with all consumer protection rules applicable by State law.

Broadband service rates, quality service standards - The Filer offers wholesale broadband to an unaffiliated third party, rather than retail to its end users. It assures the third party that it provides speeds associated with service plans purchased through its interstate tariff. For example, for lines that subscribe at speeds up to a download speed and upload speed, those speeds are provided. However, those speeds are based on a ‘best effort’ basis, due to the fact there are several aspects of the broadband network, outside of the Filer’s control, that can effect throughput speeds. The interstate tariffs are publically available for rates, terms and conditions. Once more, the Filer has internal procedures to assure that quality of service to broadband customers exceeds expectations. Therefore, although there are no current broadband service quality standards and consumer protection rules, the Filer discloses its rates, terms and conditions of service to its customers. Lastly, the Filer complies with applicable federal and state customer protection standards for all businesses in Ohio.

Response to Line 610 – Ability to Function in Emergency Situations for Voice and Broadband

Dunnell Telephone Company (“Filer”) certifies that it is able to function in emergency situations as set forth in both federal and state regulations.

Power - The Filer’s network is designed to remain functional in emergency situations where no external power is available. In such cases, the Filer has eight hours of battery backup power for its wire center and field electronics locations. The wire center is also equipped with backup power generators and automatic transfer switches. In addition, the Filer has access to mobile backup generators in case of backup power failure.¹

Routing and Spikes – The Filer has alternate routes configured in each of its local switch to assure that when the primary routes are down, traffic is re-routed to alternate routes and facilities. In addition, the Filer has overflow routes where traffic spikes may compromise the primary route traffic flows.

Procedures for voice and data - The Filer has internal procedures for emergency situations which includes emergency operations planning. Such procedures and network infrastructure utilized for emergency situations is offered as such for both voice and broadband services.
