(920) Tribal Government Engagement Obligation

There are five federally recognized tribes in Matanuska Telephone Association's service area. During 2014 MTA attempted to engage with these Tribal governments by mailing a certified letter to each Administrator, and placing a follow-up call to each office after the letter was delivered. The Native Village of Tyonek agreed to meet with representatives from MTA.

MTA met with representatives of the Native Village of Tyonek. At the meeting participants discussed:

- A needs assessment and deployment planning with a focus on community anchor institutions. Tribal administrators were invited to inform the company what improvements or new services the Tribe identified as important to their members.
- Feasibility and sustainability, specifically potential sources of funding for additional services the Tribe felt would be useful. Both the Tribe and the company acknowledged the difficulty in acquiring funding to deploy new services but agreed to communicate if potential resources are identified.
- The company's marketing efforts. The Tribe offered no comments regarding MTA's marketing.
- Reviewed the Tribe's rights of way processes, land use permitting, facilities siting, environmental and cultural preservation review processes. The Tribe reviewed potential summer projects and found MTA to be in compliance with any applicable requirements.

**Five-Year Network Improvement Plan
For Matanuska Telephone Association, Inc.**

This is submitted in response to the requirement set forth by the Federal Communications Commission ("FCC" or "Commission") for Eligible Telecommunications Carriers ("ETCs") to submit a progress report on the five-year plan, in accordance with 47 C.F.R. §54.313(a)(1) of the Commission's Rules by July 1, 2015.

Matanuska Telephone Association (MTA) is a member-owned cooperative whose service area covers approximately 10,000 square miles. Through the prudent use of long term debt funding, member supplied capital and universal service support funds, MTA has built a network able to deliver 4Mb/1Mb speeds to 88% of subscribers and continues to deploy and improve its network to deliver local exchange and broadband services to members throughout its study area. MTA is significantly reliant on the receipt of the USF that it anticipated when making the existing infrastructure investments in its network. The uncertainty of the impact of the pending and unresolved changes in the USF high cost network support system has led both to concern regarding the recovery of the company's existing network investment and to scaling back on the network expansions and improvements MTA would like to undertake for the community it serves.
