Washington, DC 20554

Dear FCC,

For over 57 years, the Northeast Tarrant Chamber has supported positive business development in Northeast Tarrant County, now one of the fastest growing areas in the country. For the past six years, we have had the pleasure of working closely with the management team from Charter and have been impressed with their commitment to our community and to customers in Tarrant County.

We are excited about the advantages that a merger involving Charter, Time Warner Cable and Bright House Network would bring to Northeast Tarrant County and want to make sure your organization knows that we support the deal to create New Charter from all three organizations being woven into one.

Our Chamber is pro-business, but that does not mean we blindly support every merger, acquisition and growth opportunity that comes along. We always look deeper to be sure it makes sense for our area businesses and residents.

We support this merger because we think New Charter will have the financial strength to invest even more in our Northeast Tarrant Communities as well as bring more innovation because of the combined strengths coming from each company.

We believe New Charter will bring faster internet speeds for even more affordable prices while also supporting the overall economic development in the area with more jobs and community investment. We also like that New Charter would put a bigger focus on customer service and bringing more jobs from overseas and we especially like their stance on network neutrality.

For all the reasons above and based on the history of Charter and their involvement in our Chamber and in Northeast Tarrant County – we support the merger to form New Charter and look forward to the explosive, positive effect the Company can have in our communities in the future.

Sincerely,

Jack Bradshaw  
President /CEO  
The Northeast Tarrant Chamber
