The buy out and transfer of time Warner cable to Charter first this deal has a lack of customer protect of transfer of Time warner cable accounts of private and sensitive information where the account customers of TWC have no say or even to sign off on there own accounts. This buy out will create a huge monopoly and bright house won't make a difference with technology and the cost would rise. The TWC customer like myself is not representative by the FCC. I have TWC my cable and internet has be blocked several time they say I didn't pay my account but I did they do track my traffic. I don't want charter I couldn't afford there service and this deal doesn't have the best interest of the consumers their not being protected of a huge bulk of TWC accounts they to have been hacked into on June 23, 2015.
