RE: MB Docket No. 15-149

Tom Wheeler
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Wheeler,

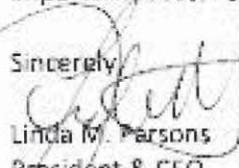

Thank you for the work that you and the FCC are doing to support a strong telecommunications industry that works for communities, businesses, and customers of all sizes. Recently, your agency has been tasked with reviewing the proposed merger of Charter Communications, Time Warner Cable and Bright House Networks. On behalf of the Moore County Chamber of Commerce, I write to lend my support to this merger.

Moore County, North Carolina, is best known for being the home of Pinehurst, a popular destination for golfers and vacationers from around the world. While it may be golf that brings many visitors to our community, it is our modern amenities that ensure they continue coming back. It is critically important that our region be able to support modern cable and internet technologies.

New Charter has committed to making significant investments in its broadband network, upgrading existing Time Warner customers to all-digital networks. This will lead to higher internet speeds, and more video on demand options. We are also pleased to see that New Charter would move customer service jobs back to the United States.

Finally, I would like to note that Time Warner has been a longtime and active member of our chamber. Over the years, the company has sponsored our "State of the State" luncheon and produced video segments honoring the winners of our "Businesses of the Year" award. We have found Time Warner to be a wonderful, locally-minded company, and we believe that New Charter would continue this important focus. For these reasons, we ask the FCC to please approve this merger.

Sincerely,

Linda M. Parsons
President & CEO
