

Dear FCC Representative,

I am submitting this comment in opposition to the Charter Communications and Time Warner Merger. Currently there are two few Internet Service Providers in many areas; and this sort of merger removes them, when in fact there is a need for greater diversity in providers. Often, only two providers in a given city; one DSL provider and one Cable provider. What needs to happen is splitting up this cable cartel into smaller components where everyone has to compete in every city, not just picking and choosing their cities. Please seriously reconsider. This is no different from the Comcast/Time Warner Merger either.

Thank you for reading or parsing through this comment,
Christopher Lee Moore
