Comment: The government continues to create rules that severely restrict basic laws of ownership, only to have to reconsider them 10 or 20 years down the road when they find that everyone has been ignoring them the whole time for perfectly good reasons.

Citizens should have a right to modify products that they buy, and to exchange those modifications with others, as long as they are not running afoul of other laws in the process. Creating new regulations that will only serve to hamper innovation and strengthen the position of large corporations is not consonant with the principles of a free society, and as long as the government continues to weaken its standing with the people by doing these sorts of things, the rule of law itself will become less and less effective.
