Re: Lifeline and Link Up Reform and Modernization, WC Docket No. 11-42,
Telecommunications Carriers Eligible for Universal Service Support,
WC Docket No. 09-197, Connect America Fund, WC Docket No. 10-90

Dear Chairman Wheeler,

As our City continues to recover from the economic recession, I wish to highlight the important role programs like Lifeline have played in helping low-income Baltimore City residents overcome unemployment and other financial obstacles. Lifeline ensures that all Americans have access to vital communications services that are meant to connect them to employers, family, healthcare and help in emergency cases. The Federal Communications Commission has done a remarkable job maintaining and updating the program since it was implemented over three decades ago.

I wholeheartedly support the FCC's proposal to modernize Lifeline and make it more effective for the 21st Century. It is extremely important for underprivileged households to have access to telecommunications services that are offered to all citizens, allowing them to be competitive in the job market and work on advancing their education. Broadband is one of these services. Although I am in favor of expanding Lifeline to provide broadband, this service should not come at the expense of traditional phone services.

Moreover, the monthly benefit amount that is currently being used for voice would not be sufficient to support broadband services or a bundle of both voice and broadband. The level of broadband qualified consumers would receive will not have a material impact on Lifeline adoption by low-income households and will not be effective to actually solve any communications issues. Furthermore, customers cannot afford to make any payments to get the additional service. As a result, free wireless Lifeline will

be adversely affected. Historically, low participation rates were the direct cause and effect of such payment system.

Establishing a system in which Lifeline benefits are directly given to customers through vouchers will also impede the ability for Eligible Telecommunications Carriers (ETCs) to reach qualified low-income individuals and households. Consumers who are eligible for Lifeline should not have limited access to the program. This proposal can also be subject to abuse by those who will see it as an opportunity to take advantage of others needs to use the voucher for an unintended purpose. Lifeline provides vital telecommunication services and it is crucial that we set adequate rules to manage the program.

The proposal to have the eligibility determinations made by either a government entity separate from the FCC or a third-party private entity under contract with the government also concerns us. ETS's should use personal identification requirements to prevent fraud and serve the same regulatory purpose, without adding an unnecessary burden on the carrier and possible delays in service for consumers. As an example, we have a secure form to check eligibility for Lifeline in this State, so there is no need to change the enrollment process and add obstacles for the neediest members of the Baltimore community.

I appreciate your consideration for my concerns and look forward to seeing the modernization of the Lifeline program. It is an important program upon which many of my constituents rely to provide access to vital communications services.

Very Truly Yours,

James B. Kraft
