Charter Communications

September 15, 2015

To whom it may concern;

Charter Communications has been the major provider of internet & TV service in Jamestown Charter Township for quite some time. The township has appreciated the service they provide in several different aspects. A number of the schools in the township receive direct benefits and this impacts several hundred students in each of the affected schools.

We also have a sizeable portion of the township which is rural. These folks have also been increasingly able to access the internet because of the efforts of Charter and its investment into our community.

Given their commitment to Jamestown and their service to our residents, I whole heartedly endorse the proposed merger.
