RE: MB Docket No. 15-149

Tom Wheeler  
Chairman  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Wheeler,

We are writing to express our support for the proposed cable broadband company New Charter. At the South San Antonio Chamber of Commerce, we champion local partnerships and alliances in an effort to continue building our region's dynamic economy. We support New Charter because it would bring high-speed, affordable broadband to our members and area residents.

New Charter would unite Charter Communications, Time Warner Cable and Bright House Networks. The company would offer consumers the latest innovations by committing to investing in products that will drive the future of technology. This would include bringing all customers to full digitization and providing a cloud-based guide. In addition, New Charter would invest in valuable fiber-optic technology in commercial and residential networks. This would provide businesses and residents with the fastest and most reliable connection to the Internet available. New Charter would also work to improve WiFi access by deploying 300,000 out-of-home hotspots across its national footprint. Each of these commitments ensure all customers would have access to the latest innovations, allowing them to leverage the Internet in their personal and professional lives.

We are supportive of New Charter because it would improve broadband in our community. We ask that you consider the impact of the company and approve the merger.

Sincerely,

Al Arreola  
President and CEO, South San Antonio Chamber of Commerce
