As a Time Warner Cable customer since 1980 I oppose this buy out and transfer of my account with so much sensitive privation information of my account such as my social security number, my name, address, banking information, email Time warner Cable sets the password not me, my snap card and drivers license TWC has a copy of them, my account package and service prices. Charter will inflate prices in looking at there prices I couldn't afford cable, internet or phone services through them. This would create a monopoly. I only have one choice that is Time Warner cable. No Charter my account is private.
