Public Notice: can be obtained on the Internet at:
<https://ebiznet.att.com/networkreg/>

Network Change:

BellSouth Telecommunications, LLC. d/b/a AT&T Mississippi is announcing that In the Ripley WC (RPLYMSMA)-Route 2, copper feeder facilities are being removed due to a Mississippi DOT road project in which the facilities are in conflict. Five existing cross-connect boxes (XBOX) are fed from the Central Office copper facilities with 257 working circuits. The five locations will be cut behind proposed Tellabs 1000 Digital Loop Carrier systems and approx. 2700' of aerial 1500/1800/1200 pair copper cable will be retired from F 554 E. Walnut St. to P 29 Hwy. 4 E. There are CLEC circuits in each of the locations involved. The proposed Digital Loop Carrier systems will provide Pair Gain facilities through feeder fiber. The affected copper cable count is 1,101-525; 5,351-650; 5,701-900; 14, 101-700.

Description of Type of Changes Planned:

It is proposed to cut the existing all-aerial feeder facilities to proposed fiber-fed DLC facilities at the following locations in the Ripley, MS wire center.

The XBOX(s) and the respective spare pairs after the cut-over are shown below:

XBOX	# OF DLC SPARES AFTER CUTOVER
PED 1 HWY 370	177
PED 8E HWY 370 S	223
11901 HWY 4	231
109 PARK ST	168
102 TWIN LAKE WILL BE CUT BEHIND PED 1 HWY 370	

Description of Reasonably Foreseeable Impact of the Planned Changes:

After this Plan is implemented and work is completed, metallic feeder facilities from the Central Office to the affected area will no longer be available. Unbundled loops that are defined as compatible with Digital Loop Carrier (DLC), e.g., those defined to transport POTS-grade service, will be transferred to the new DLC system without consequence. Competitive carriers employing unbundled loops that are defined to require metallic facilities, e.g., Digital Subscriber Line (DSL) or line sharing circuits will be notified individually. This notification is intended to allow the affected carrier to convert the circuit to one compatible with DLC. **Currently, there is currently 52 Competitive Carrier circuit of this type on the affected copper facilities.**

It should be noted that if a competitive carrier obtains an unbundled loop that has been defined to transport POTS-grade service, but then utilizes this loop to provide DSL service, AT&T will have no knowledge of the presence of DSL. In such a case, AT&T has no basis to notify the carrier and the ability of the competitive carrier to provide DSL service may be affected.

Location of Change:

CLLI Code/Statewide	City	State	Implementation Date
RPLYMSMA	RIPLEY	MS	2 nd Qtr 2016
