Please change regulations to allow rebroadcasting in any form. Media companies like Time Warner Cable and Comcast as well as any of their present and former CEOs and lobbyists should not be involved in these discussions at all. These companies are consistently ranked as the most hated companies in America. Please promote desperately needed competition in this industry and allow all forms a rebroadcasting with no penalty. I think for the next 2 years Comcast and Time Warner should subsidize new companies rebroadcasting materials to make reparations for all the damage they have done to this industry through their greed, disregard for customer service, and practices that promote their monopoly.
