

Tom Wheeler
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Wheeler,

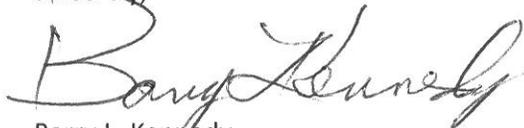

The Nebraska Chamber of Commerce & Industry is happy to extend its support to the merger of Charter Communications, Time Warner Cable and Bright House Networks into New Charter. The Chamber represents approximately 1,600 businesses in every county in the state, advocating on behalf of Nebraska businesses in many areas, including on issues relating to job creation and economic development. We believe New Charter would contribute greatly in these areas and we urge the approval of the merger.

The merger aims to have a positive impact on the telecommunications industry. New Charter would look to boost American jobs by bringing outsourced Time Warner Cable customer call centers back to the U.S.; a move intended to not only create jobs, but improve the level of customer service.

New Charter has also committed to invest in network upgrades, digitization, cloud-based technology and WiFi access. For example, the company says it would invest at least \$2.5 billion to upgrade commercial networks, bringing fiber-optics to businesses in mainly rural and underserved communities. The Chamber supports this effort to create economic development opportunities for Nebraska businesses large and small.

We encourage you and the Commission to support of the merger.

Sincerely,

Barry L. Kennedy
President, Nebraska Chamber of Commerce & Industry
