RE: MB Docket No. 15-149

Tom Wheeler  
Chairman  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Wheeler,

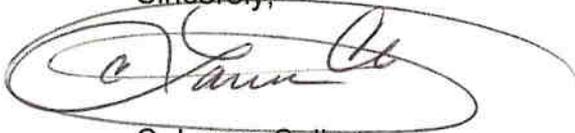

We are writing today to support the merger of Charter Communications, Bright House Networks and Time Warner Cable into New Charter.

Roseburg, Oregon is located in rural southwestern Oregon, in the heart of the Hundred Valleys of the Umpqua. For years, we have relied on Charter Communications to provide our community with cable and broadband services. We have enjoyed a positive relationship with Charter, and believe this merger would improve access to quality Internet service for our town and communities like it.

One aspect of the merger that we believe is important is New Charter's commitment to expanding Bright House Networks' broadband program for low-income consumers. New Charter will not only make this program larger; they will make it better. They are committed to raising broadband speeds while still offering a discounted price. This is especially important in rural areas like ours, where the Internet is the one of the best tools people have to stay in touch with the world around them.

Quality and affordable cable/broadband services are critically important to rural towns, and New Charter would ensure that Americans everywhere have access to the best services available. We urge you to support this merger.

Sincerely,

C. Lance Colley  
City Manager  
City of Roseburg
