RE: MB Docket No. 15-149

The Honorable Tom Wheeler
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Wheeler,

The Chamber of Commerce Serving Middletown, Monroe and Trenton is a business advocate for our service area and consider the impact of all potential industry changes before lending our support.

Telecommunications is a special industry that we see time and again affects our members. This is why we believe New Charter has the potential to make such a positive impact. As a company prioritizing innovation and prices, it stands to benefit many Ohio businesses.

New Charter customers would provide a range of services such as no modem fees, faster internet speeds, the latest cloud-based technology and quality customer service. New Charter's broadband packages would offer a range of speeds starting at 60 Mbps and going up to 300 Mbps, appealing to employers of all size. We know our service area needs and would appreciate this kind of service, and we expect that applies to most all entrepreneurs.

We encourage you to consider the benefits and support the merger which would become New Charter.

Sincerely,

Richard M. Pearce
Chairman/CEO
