How will Charter change the same problems that Time Warner customers have that is the question. Can they change the poor signal from NYC the dropped internet connection and the dropped phone calls. Can Charter change the old coax cables that run in our homes and businesses. No. Cable companies make 95% profit if you have 3 services like phone, internet, and cable services. Still have poor internet and phone connections. NO No.
Can't buy out a company if there having the same problem it doesn't solve anything only raises prices. NO DEAL.
