

RE: MB Docket No. 15-149

Tom Wheeler  
Chairman  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Wheeler,

As a member of the Alabama House of Representatives, I am pleased to offer my support to the merger of Charter Communications, Time Warner Cable and Bright House Networks into New Charter. I believe the company would be unique in its industry. It would offer exactly the services consumers demand, including fast broadband speeds and a commitment to network neutrality.

New Charter's products would be on par with the latest innovations. The company's plans to invest heavily in digitization and fiber-optics would ensure all consumers are granted fast and reliable service. This is of great importance not just for convenience, but also too for economic growth. Businesses are major subscribers to broadband, and their ability to succeed more and more relies on strong technology capabilities.

New Charter's commitment to network neutrality would also benefit businesses. The company would not favor certain domains and would issue flat rate billing so that businesses and individuals could access the Internet without data restrictions.

I am confident New Charter would be a great addition to the cable broadband industry. I urge you to recognize the impact of its commitments to innovation and network neutrality and approve the merger.

Sincerely,

Representative Kyle South  
Alabama House of Representatives, District 16
