Washington, DC 20554

Via: electronic filing, and Postal Service

REF: Region 9, Regional Planning Committee filing of revised Regional Plan reference
PS Docket 13-87, WT Docket 02-378, WT Docket 14-172, and PS Docket 06-229

Sirs:

This filing letter is in accordance with the above Dockets to incorporate the new channel listings for Transportable systems, and the previous air-to-ground channels under WT Docket 14-172.

The entire approved Regional Plan from DA 09-874 was copied into the new format provided by APCO. This provided better clarity and appearance for this document. The changes that have been incorporated are:

- The addition of Region 23 into the adjacent region table. Page 4.
- The addition of the defined channels for reserve spectrum and deployable systems. Pages 8-9.
- The addition of the Air-to-Ground channel listing, Reference FCC 14-172. The statement that the State of Florida SEIC will coordinate these channels. Page 10.
- The redefining of Channel loading includes "talk paths" and regional systems design into the loading matrix. Pages 15-16.
- The addition of the deployable channels to the channel grant matrix. Page 81.
- The addition of Appendix J, 700 MHz pre-Assignment Rules and Recommendations for references by licensee's as provided by APCO and NRPC. Pages 85-97.

Sincerely,

Chairman

CHAIRMAN - SUBREGION 1
