Mr. Wheeler, As I read the other comments of the transfer Time warner cable to Charter their from a wide variety of companies and politicians but I'm a customer of Time warner cable this transfer will impact me and the accounts of TWC. What's wrong with this transfer what's in this transfer for customers of TWC their a lack of information to me. do I want my account to be transferred with all my bulk of MY private information NO do I want Charters high prices and equipment lease fees and other high fees No. Is this fair to time Warner cable customer to say where going to transfer or sell your account to charter and there is nothing you can do about this that's what's wrong with this deal. The customer of Time Warner cable are not even being considered we are just tossed aside and let corporation's take over us. I have to say how sad and yes I'm angry because nobody is asking us we the customers of Time Warner cable their selling us out. No deal .
