October 30, 2015

Rear Admiral David G. Simpson
Bureau Chief
Public Safety and Homeland Security Bureau
Federal Communications Commission
445 12th Street SW,
Washington, DC 20554

Dear Rear Admiral Simpson,

Enclosed is the modified Region 14 700 MHz Plan, which includes modifications required by the Commission. These are the inclusion of the former “Reserve Channels, “ and usage designations of the same. The new Air to Ground 700 MHz frequencies have also been added to the list of interoperability channels available in the Region 14 Area.

These additions have been approved by the Region 14 700 MHz Regional Conformance and Review Committee (RCRC) and all the Regions adjacent to Region 14, namely 13, 17, 21, 33, and 54. Approval letters from each of the adjacent Regions are also included with this submission.

The modified Region 14 Plan is being submitted for the Commission’s approval under WT Docket 02-378. Two copies of it are being sent: one highlighting changes to the Plan in yellow, and one with no markup.

Thank you for your consideration,

Alex R. Whitaker

Chairman Region 14
