RE: Proceeding No. 15-149

Dear Chairman Wheeler,

I would like to offer my sincere support of Charter's proposed merger with Time Warner Cable and acquisition of Bright House Network. As the Supervisor of the Salem Township, I believe the creation of this merger and acquisition would have far reaching, positive benefits for the residents of our township.

Specifically, combining Charter's business model of faster internet, affordable prices, transparent billing and commitment to American jobs with Time Warner Cable's diversity initiatives and Bright House Network's excellent customer service expertise, would bring the best of the three companies together for the benefit of our residents.

The New Charter will bring greater access to broadband by building upon Bright House Network's broadband program for low income customers. Also, it would help provide high-speed service to rural areas, such as Salem Township.

I am confident New Charter would be a great benefit to Salem Township residents. I appreciate you taking the time to consider my comments on this matter.

Sincerely,

Gary Whittaker  
Salem Township Supervisor
