RE: MB Docket No.15-149

Mr. Thomas Wheeler
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Wheeler,

At SET Ministry, Inc. (SET), we believe the proposed cable broadband company New Charter would greatly assist Milwaukee citizens trapped in poverty. As a community-service oriented organization, we provide healing support for children and adults who have suffered from challenges related to poverty. We are confident New Charter would work to improve the lives of our clients, and we urge you to approve the merger.

Charter Communications, Time Warner Cable and Bright House Networks have all worked hard to promote diversity in many areas of their businesses. As they merge into New Charter, diversity and inclusion would be pillars of the company's outreach. With initiatives planned for hiring, procurement, programming and community investment, New Charter is prepared to bring increased diversity to the telecommunications industry.

We are most impressed with New Charter's low-income program. Already seeing great success under Bright House Networks, the initiative would reach a contingent of consumers that typically cannot afford broadband. We know the value in having an online connection at home, and we look forward to partnering the people we serve with New Charter.

New Charter has outlined in detail its diversity and inclusion initiatives. We hope you understand the importance of the company's commitments and move to approve the merger.

Sincerely,

Laurene Gramling Lambach
President and CEO
