Dear FCC,

My name is Harrison Lucas and I live in Huntington, WV.

The principles of user choice and control are vitally important for a vibrant wireless ecosystem. But as written, the NPRM threatens to undermine these ideals by limiting what users can do with their devices. That's a concern, because I don't want to see community innovations, such as mesh networking, get cut off.

The draft rules could enable device manufacturers to forbid third-party software, which would make me feel less safe about the wireless networks I use and operate.

Open wireless devices matter. People don't learn and innovate by being restricted in the tools they use, they innovate by exploring new ways to connect and use everything that they have available to them. Not only that but it runs counter to the internet culture to restrict what people are allowed to customize to suit their needs. People need to be allowed to tweak their equipment as they see fit.

Sincerely,

Harrison Lucas
