

60001336179.txt

Consumers want to watch live, local broadcast television online, and they want competition to cable & satellite providers. Consumers are also very clear that they do not want existing or future non-broadcast services (ie, Hulu, Netflix, YouTube, HBO Now, SlingTV, etc.) to fall victim to over-reaching regulation by FCC rules - either intentional or unintentional.

Thank you for your support!

Regards,

Michelle Ormond
