Dear FCC,

My name is Jeremy Allen and I live in Cheyenne, WY.

The principles of user choice and control are vitally important for a vibrant wireless ecosystem. But as written, the NPRM threatens to undermine these ideals by limiting what users can do with their devices. That's a concern, because Less Government Regulation is the key to innovation and an underpinning of democratic society

The draft rules could enable device manufacturers to forbid third-party software, which would keep me from using my custom wireless configuration.

Please leave our internet alone, rarely does government involvement help with anything and usually generates more problems than solutions.

Sincerely,

Jeremy Allen
