Net neutrality is a pressing issue that I personally believe NEGATIVELY affects the freedoms and liberties ALL citizens of the world. It surely benefits only a handful of organizations with little to no reward for society. It's imperative that we review and abolish these proposals on broadband management as soon as possible to put an end to ongoing threat of for-profit oppression of the internet, one of the most revolutionary and unifying tools ever developed.

Please CLASSIFY INTERNET SERVICE PROVIDERS AS COMMON CARRIERS. Thank you.
