As a time warner cable customer since 1980 I oppose having any of my private information of my account to be transferred to charter and the bright house network. Bright house has control of the upload and down load speed of the internet I have a huge issue with my internet speed and also with disconnections and black out of my telephone and internet.

A big problem for time warner cable customer and even for Charter. I looked at Charters prices and lease fees they are not a a fair price. Do i want Charter NO. this will create a monopoly and not fair to the smaller telecom companies. I don't trust Charter at all and I couldn't afford them. Many jobs will go over seas. I say NO to Charter and to brighthouse control. Thank you
