Comment: Foreigners will be encouraged by our own government to buy U.S. media properties that they can use for their own propaganda purposes.

Once a license is granted, any broadcasting of distortions, deletions, or disinformation simply becomes "protected political speech" and would be nearly impossible to use for revoking a license. At that point, little will stop the propaganda machines from running full tilt

A license to broadcast to the public over public airwaves has far reaching long term national security implications. It cannot be compared in any way to the international trade of widgets, cars or consumer electronics, as some would like us to believe

If this proposal becomes FCC policy, public sentiment in the U.S. will progressively be molded by forces that owe no allegiance to the U.S. or even the truth, and many may also wish to do us harm. The roles before the FCC will be reversed with the propagandists essentially being guaranteed a license to use

America's airwaves to subvert America itself. The FCC will be legally forced to assume that anyone from anywhere who wants a license is automatically our friend unless someone can prove otherwise.

Such a policy change will undermine our First Amendment rights of free speech. Just look at the RT reporters who have quit because they were prohibited from telling the truth and ordered to spread lies

Docket No. 15-236
