Dear FCC,

My name is Beau and I live in Richfield, MN.

The principles of user choice and control are vitally important for a vibrant wireless ecosystem. But as written, the NPRM threatens to undermine these ideals by limiting what users can do with their devices. That's a concern, because I want to be able to update my own wireless software?not rely on slow manufacturers shipping updates.

The draft rules could enable device manufacturers to forbid third-party software, which would make me feel less safe about the wireless networks I use and operate.

The Internet was originally supposed to be free. The internet gives the people a voice. Its bad enough the there are even adds on the internet that we are sometimes forced to watch. STOP THE MADNESS!!!! Keep the internet free and kick the big corporations out of the public domains!

Sincerely,

Beau
