RE: MB Docket No. 15-149

Tom Wheeler  
Chairman  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Wheeler:

The Burlleson Area Chamber of Commerce has enjoyed a great partnership with Charter Communications over the years. Charter has not only supported the Chamber through sponsorships of our quarterly luncheons and golf tournaments, but has is the provider of internet and phone services for our offices. We are their customer as well as their Chamber of Commerce.

The Burlleson Chamber supports Charter as it pursues growth through the entity of New Charter, a potential addition to the telecommunications industry to improve our nation's broadband infrastructure. We understand how access to broadband internet helps small businesses, our own office being a real life example, and encourage New Charter's efforts to make this opportunity available on a broader scale.

Burlleson is a growing community in northern Texas that is home to many types of businesses. Every business today requires reliable internet services. New Charter's commitment to upgrade the national broadband infrastructure would positively impact businesses and communities around the country.

Sincerely,

Sherri Sechrist  
President, Burlleson Chamber of Commerce
