Dear FCC,

My name is Robert P Jewett and I live in Georgetown, TX.

The principles of user choice and control are vitally important for a vibrant wireless ecosystem. But as written, the NPRM threatens to undermine these ideals by limiting what users can do with their devices. That's a concern, because I want to be able to update my own wireless software?not rely on slow manufacturers shipping updates.

The draft rules could enable device manufacturers to forbid third-party software, which would keep me from using my custom wireless configuration.

I need the additional services that are offered with third-party open source software that are not generally available with OEM Router software.

Sincerely,

Robert P Jewett
